

# Haruki Tanaka

田中 陽輝

First year master's student in the Graduate School of Information Sciences and Arts at Toyo University. I research stylized rendering from 3D scenes and work on software development and process improvement. I also publish technical articles about what I learn.

## Education

**Apr 2026–** Master's program, Graduate School of Information Sciences and Arts, Toyo University

Researching stylized rendering from 3D scenes, using coarse 3D geometry to maintain visual consistency across viewpoints.

**Apr 2022–Mar 2026** Faculty of Information Sciences and Arts, Toyo University

Interdisciplinary coursework spanning computer graphics, VR, AI, data science, and psychology.

## Experience

**Sep 2025–** Intern, H-POWER Holdings Co., Ltd.

Contributed to shared internal systems and process improvement, from problem framing and implementation to validation and coordination with stakeholders.

## Awards

**Sep 2026** Grand Prize, Okuma Hackathon 2026

Built Kiumaru in 16 days for ReFruits, a kiwi farm in Okuma, Fukushima, to manage harvesting, ripening, and shipping. Highest score from every judge among six teams.

**May 2026** 3rd Place Overall, Engineer Guild Hackathon presented by Mercari

Product manager of a four person team. Built HowTune, a music app that visualizes listening behavior using AirPods head motion and an LLM. Judged by Mercari, P&G, and Money Forward.

## Certifications and Programs

**Sep 2026** AI Entrepreneurship Summer Program 2026 — Completed

Completed a program hosted by the Matsuo–Iwasawa Laboratory at the University of Tokyo on developing AI based business plans for industry problems.

**Feb 2023** Information Technology Passport Examination (Japan)

**Jan 2023** Japanese standard driver's license

## Skills

**Languages** TypeScript / Python / Swift / GLSL

**AI and LLMs** Applied AI and interactive prototyping

**Cloud** Google Cloud / Terraform / GitHub Actions / Firebase

**Graphics** Three.js / WebGL / Custom GLSL shaders / Unreal Engine 5 / Blender

**Frameworks** React / FastAPI / SwiftUI

**Other** Architecture decision records / CI, CD, and IaC / Cross functional project leadership

## Writing

Technical articles on Zenn — Topics include production design for agentic AI, FAQ knowledge for voice AI, and a firsthand account of an AI confabulation incident.
